

CPP Benefit Rate Table

This table provides a list of the annual Year's Maximum Pensionable Earnings (YMPE), Average Year's Maximum Pensionable Earnings (AYMPE) and Year's Basic Exemption (YBE) amounts under the Canada Pension Plan (CPP). The table also provides a list of the maximum monthly amounts payable for each of the CPP benefit types and the annual escalation factors that are used once a benefit is in pay.

Year	YMPE	AYMPE	YBE	Max Retirement	Max Disability	Disability flat-rate	Max <65 Survivor	Max >65 Survivor	Survivor flat-rate	Child's Benefit	Max Death Benefit	CPI Increase	Max Employee Contribution	Contribution rate
1966	\$5,000	\$5,000	\$600	-	-	-	-	-	-	-	-	-	\$79.20	1.80%

Note 1: AYMPE is normally a 3-year average pre-1998, 4-year average for 1998, and 5-year average post-1998.

Note 2: AYMPE is always a 3-year average if the contributor's date of birth is before Jan. 1, 1933 (grandfather protection), which results in higher maximums than indicated above, if applicable (for 1998 and later).

Note 3: Survivor benefits have a slightly different maximum if the contributor dies in December of the preceding year, because the Unadjusted Pensionable Earnings (UPE) is escalated to year of death and then escalated by the Consumer Price Index (CPI) for January of following year.

Note 4: Escalation figures for 1973 depended on the year benefit was effective, as follows:

1967–1.1082	1970–1.0488
1968–1.0915	1971–1.0236
1969–1.0698	1972–1.0206
